Skills

Programming/Markup/Stylesheet/Notation languages
Javascript [ES5, ES6, ES7, ES8] (Browser and Node.js), TypeScript, PHP, Dart, CSS3, JSON, XHTML, JSX

Preprocessors/Static type checkers
Flow, SASS, Compass, LESS

Back-end - PHP frameworks & libraries
Laravel, Lumen, CodeIgniter, Slim Framework, BotMan, Smarty, Twig, Swagger for PHP

Back-end - Node.js frameworks & libraries
Express, Puppeteer, Socket.IO, TypeORM, Sequelize, TypeGraphQL, Swagger for Node.js, AdonisJs, Next.js, After.js, Gatsby, Pug, EJS

API construction
REST, GraphQL

Front-end- Frameworks & Libraries
React, Redux, Vue.js, Vuex, jQuery, Axios, Lodash, Bootstrap, Materialize, Material-UI, Handlebars, Glamor, Glamorous, JSS, Styled components, Emotion, Styletron

Mobile - Frameworks & Libraries
React Native, Flutter

Linting/Code Quality Tool

Linting/Code Quality Tool

Eslint, JSLint, Standard JS, PHP_CodeSniffer

Query languages

GraphQL, SQL, ReQL, MongoDB Queries

Databases

MySQL, RethinkDB, MariaDB, PostgreSQL, MongoDB, Redis, MSSQL, SQLite

Prototyping

Figma, Zeplin, Adobe XD, InVision

Version control

GIT, SVN, CVS

Test tools

Jest, Enzyme, Jasmine, PHPUnit, Selenium

REST API description tool

Swagger, Blueprint, Apiary

CMS

WordPress (plugins, themes and widgets)

Dependency managers

Yarn, Npm, Composer

Module bundlers & Task runners

Webpack, Gulp

Work/Deployment environment

Docker, Vagrant, Heroku, Digital Ocean, Linode, Generic shared hosts

Others

Babel, Storybook, MVC, ORM, OOP, AWS (S3), Functional programming, SOLID, Natural Language Processing, Scrum, Continuous Integration, Continuous Delivery, Progressive web apps, Reactive programming, Memcached, Responsive design, Web standards, Performance, Usability, Accessibility - a11y, SEO

Experience

Clevertech consultant - Front-end Engineer   Clevertech

Jul, 2019 - May, 2020

Working on Clevertech clients, using React, Redux, and related technologies.

Aubay consultant - Front-end Engineer   TripAdvisor

Oct. 2018 - Jul. 2019

Oct, 2015 - Jul, 2017

Working on internal tools and projects for the hotel's segment, using React, Redux, and correlated technologies, migrating legacy technologies to a new stack, or adding new features on current products.

Aubay consultant - Front-end Engineer   OLX
Sep, 2017 - Sep, 2018

Front End engineer at OLX, working on a product for premium sellers on a vertical platform focused on cars sales in some European countries (Standvirtual in Portugal, Autovit in Romania, and Otomoto on Poland). The challenge here was to maintain legacy software (monolithic architecture, classical MVC with PHP) and at the same time work with new technologies (SPA, PWA, microservices architecture, etc.), migrating parts of the product and keeping some points as a priority, like SEO.

Tech Lead & Full Stack Developer   Planedia
Jun, 2013 - Jul, 2018

I worked on this startup since it was founded, working as a back-end, using PHP & Laravel. Sometime later, I switched for a front-end position, working with React & Redux. I also helped with the recruiting process to get new developers and taking technical decisions.

Front-end Engineer   Liferay
Mar, 2012 - Feb, 2013

Allocated inside a Liferay customer (Leroy Merlin Brazil), I helped to upgrade the customer website, applying the most recent Liferay features and the Liferay best practices, and to convert it on e-commerce portal, able to sell more than 80.000 different products.

Front-end Engineer   Record TV
Jan, 2011 - Mar, 2012

I worked on the blogs team, using WordPress. Involved in dozens of projects, I created blogs and sites for soap operas, reality shows, news programs, journalists, auditorium programs, etc. My mission was creating themes, plugins, and widgets for different projects. Previously, the company has contracted external partners for creating his projects. I started on a new blogs team (I was the third member). At the end of the year, we were more than 20 members. There were no more external partners working on projects because the sites and blogs were created and maintained by our team.

Back-end Developer   Grupo Ser Educacional
Oct, 2008 - Feb, 2012

As a back-end developer, I worked on some educational software inside of this company. With more than 100.000 students around the country, the educational group needed software to the handle library books and books reservations, control financial data, students make enrolment, paying his monthly tuition, entrance exams, etc.

Courses

Bachelor of Computer Science   Faculdade dos Guararapes
Jul, 2006 - Dropout

Mechatronics technician   ETEPAM
Jan, 2008 - Dropout

Computer Technician   IFMA
Jul, 2006 - Dropout

Electronics Technician   IFMA
Jul, 2004 - Dropout

Open Source

Laravel bootstrap forms 4
https://github.com/netojose/laravel-bootstrap-4-forms
Laravel 5 package forms for bootstrap 4

Laravel 5 API REST explorer
https://github.com/netojose/laravel-api-explorer
API explorer for laravel applications
